

■ **EXCEPTIONALLY FAST**

Two doors in one, high speed for quick access and high strength for security. Operating speeds of up to 36" per second. Optional two-speed motor.

■ **ULTIMATE DURABILITY**

Electric direct drive power system for speed and long life. Rigid unitized, interlocking slats have an anodized aluminum exterior, shock absorbing PVC interior surface, dense polyurethane foam insulation, and nylon windlocks and wind guides. Side guides are lined with high density PVC eliminating metal-to-metal contact with slats. No need for roller wheels and other high wearing, high maintenance parts.

■ **MAXIMUM SECURITY**

Marathon's 109D rigid roll-up door is ideal for large openings requiring quick access and security. With its rigid slat design, operating speeds of up to 36" per second and reliable operation in the highest cycle applications, the 109D provides the ultimate in protection for your facility.

■ **ENERGY EFFICIENT**

Maintaining climate control and reducing energy costs in any facility can be a major challenge. Slow overhead doors opening throughout the day can result in significant energy loss. With its insulated slats and high speed operation, the 109D will help lessen air exchange and reduce energy consumption.

■ **INNOVATIVE DESIGN**

With its springless, direct drive operator that can be mounted in several configurations, and a curved panel profile that allows the door to roll into a compact drum, the 109D is ideal for applications with tight headroom or side clearances. With no roller wheels, belts, cables or extension springs to wear out, the 109D delivers exceptional performance while reducing maintenance.

■ **CUSTOM SYSTEMS**

Marathon door systems are designed and precision manufactured to your specifications at our corporate location in Milwaukee, Wisconsin. We are able to accommodate a variety of applications and special requests. Whether it is a custom color, a special window configuration, activation requirement or, a size that defies standard offerings, we can build a door that will compliment your building's design.

MODEL 109D

High Speed - **Extra Large**
High Performance Roll-Up Door - Direct Drive
MODEL 109D POWER

Innovative Design. Superior Performance. Exceptional Value.

MARATHON HIGH SPEED, HIGH CYCLE DOORS, DESIGNED FOR THE LONG RUN.

Marathon rigid roll-up doors are designed to provide high speed operation, high cycle life and minimal maintenance for outstanding security and performance.

Featuring a totally springless design that eliminates the need for roller wheels, belts, cables and other high wear, moving parts, Marathon's 109 series doors provide worry-free operation over hundreds of thousands of cycles.

Our proven technologies also ensure significant energy savings, improved traffic flow and increased security. A faster insulated door means less air exchange and less energy consumption. High speed operation enables quick entrances, exits and quick close down of area for increased security.

Marathon: higher security, lower operational costs, greater value.

MODEL 109D

High Speed - Extra Large
High Performance Roll-Up Door - Direct Drive
MODEL 109D POWER

DESIGN AND CONSTRUCTION

DOOR SIZES

- Up to 30' wide x 23' high.
(Other sizes available - consult factory.)

PANEL CONSTRUCTION

- Unitized design.
- Exterior face constructed of anodized aluminum.
- Interior face constructed of rigid PVC.

OPERATION

- PLC control panel.
- 2 speed operation.
Opening speeds of up to 36"/sec.
Adjustable closing speeds.
- High output electric direct drive 1, 2 or 3 h.p. totally enclosed motor available.
- NEMA 4 fiberglass control box.

PERFORMANCE FEATURES (POWER MODELS)

- Reversing edge for instant stop/reverse.
- Manual chain override.
- Send and receive reversing photoeye.

INSULATION

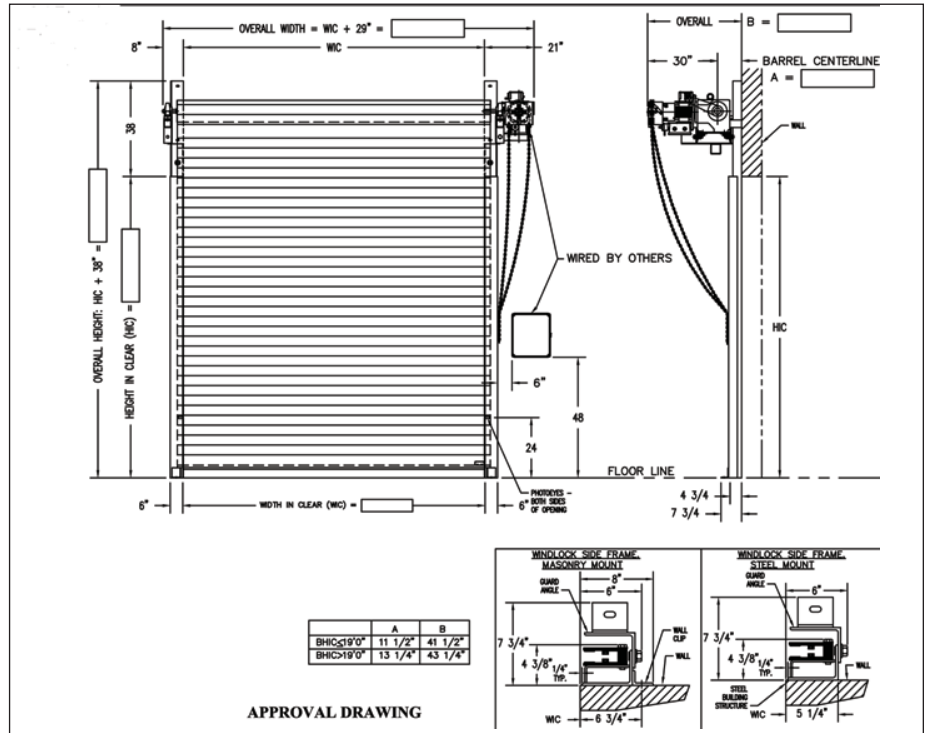

- High density foam in place insulation.
- "K" factor of .12 at 75° F.

WARRANTY

- One year limited warranty on all components.

OPTIONS

- Light Screen.
- Activation devices:
 - Pull Cord.
 - Single Push Button.
 - Photoeye.
 - Radio Control.
 - Loop Detector.
 - Pre-announce to close kit (light or alarm/or combo).
 - Motion Detector.
- Adjustable time delay close with auto close feature.
- Window slats in four slat increments.
(Custom configurations available.)
- Operator and barrel shrouds.
- Non-insulated slats available.
- Custom colors.

Standard dimensions shown. For tighter clearance requirements, consult factory.

DENSE POLYURETHANE FOAM INSULATION

Seals out winter cold and summer heat.

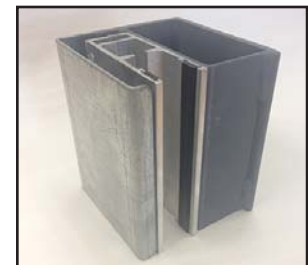

OPTIONAL PRE-ANNOUNCE TO CLOSE KIT

Available with light, alarm or combo.

OPTIONAL POLYCARBONATE WINDOW SLATS

Allow visibility without compromising security.

NYLON SIDE GUIDE STRIPS

Eliminate metal-to-metal contact with slats.
