

Series BG550

air frame inflatable truck shelter

BLUE GIANT®

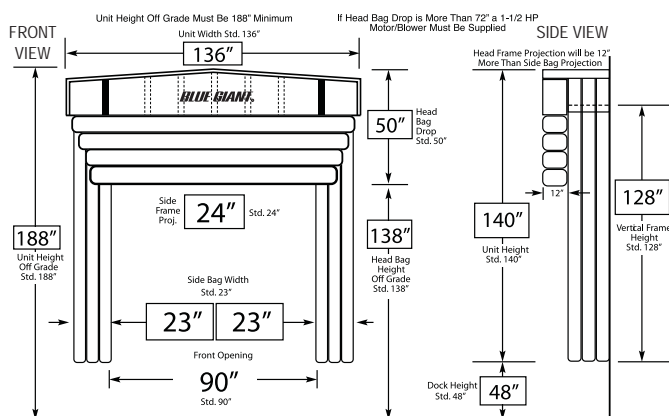

Designed for 10' x 10' (3048mm x 3048mm) door openings, the BG550 series air frame inflatable truck shelter is a rugged and practical design that can be completely retracted when not in use, safeguarding against external damage and improving cost of ownership.

Benefits

- SAVE hundreds of dollars in reduced energy costs
- IMPROVE working conditions by keeping dust, dirt, debris and insects out
- PROTECT product and personnel from harsh weather conditions
- INCREASE productivity by providing a safe and comfortable working environment
- DURABLE range of Hi-Performance fabrics to choose from
- CUSTOM sizes available

Standard Size Specifications

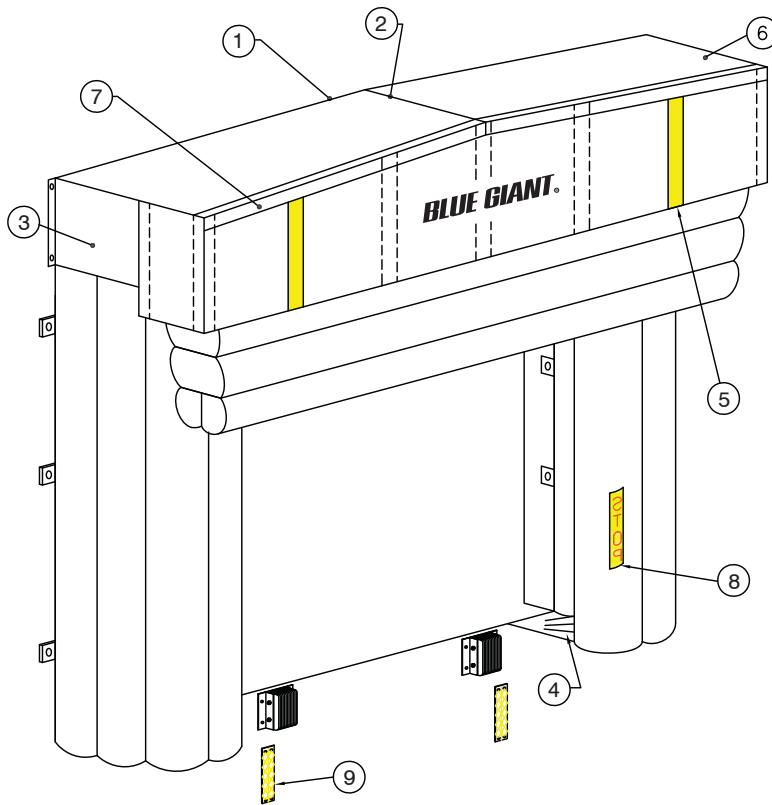

Generally designed to suit 10' wide x 10' (3048mm x 3048mm) high openings.

The BG550 series service a large variety of trailer heights. This unit allows full access to the rear of the trailer when loading and unloading.

An internal oil tempered spring on the header air bag and counter weight retraction design on the vertical bags allows the top and side air bags to fully retract when not in use. This design prevents damage from incoming trailers since the unit is inflated after the trailer has docked and deflated before trailer departs.

Blue Giant offers a wide variety of custom inflatables to satisfy your dock requirements.

1. Pressure treated framing resists rot (optional galvanized frame available)
2. Raked head frame diverts water to sides
3. Galvanized side supports support head frame
4. Replaceable draft flap seals bottom gap between truck and building wall
5. Yellow guide stripe ensures accurate placement of trucks
6. Translucent polyethylene sheeting with UV inhibitors allows light into loading dock area
7. Galvanized trim angle will not rust
8. "Stop" logo on side air bag to prevent trailer from entering dock area if bag is accidentally left inflated
9. Optional "reflective guides" ensure accurate truck placement to help maximize efficiency of unit

Customize Your Dock to Suit Your Specific Needs

(Top View)

Conventional foam pads protect against weather, but restricts access to the trailer opening.
