## *Built strong for the challenges of a busy loading dock*

**The HD Series LED Dock Light can outlast 25 incandescent bulbs while using up to 94% less energy.**

### *Dependable Performance in All Environments*

The HD (Heavy-Duty) Series LED Dock Light is designed to perform efficiently in the most demanding loading dock environments, such as extreme temperatures and wet or damp conditions. Rated NEMA4 and IP66.

### *Customized to Suit Any Application*

Available as a complete dock light (with arm and light head) or just as the light head, the HD Series comes in a wide range of configurations, such as single or double arm, swing or flex, and as a fan / light combo.

### *Rugged and Compact Housing*

The light head's polycarbonate housing resists impact damage from forklifts or incoming trailers, lowering maintenance costs and minimizing the risk of downtime or interruptions in the cargo handling process.

### *Continuous Quality Light*

The HD Series LED light's intensity exceeds a 300-watt incandescent bulb, but uses only 18 watts to emit a cool white light. The constant-current IP66 LED driver is rated for 100,000 hours of operation at 77° F.
