

9600 MODEL

CLASSIC STEEL

R-11* Polyurethane Insulation
Pinch-Resistant Panels
Limited Lifetime Warranty

Sonoma Panel, Desert Tan Finish, Arched Stockton Windows

door construction

- Embossed, high tensile steel panels give the look of wood with the strength of steel.
- Two-coat, baked-on polyester finish is virtually maintenance-free. This finish also makes an excellent base if you repaint to match the existing exterior colors of your home.
- The foamed-in-place polyurethane insulation is chemically bonded to each steel section, creating a structure with higher strength and dent resistance.
- Heavy-gauge steel wraparound end caps trim-out door edges for better appearance, improved strength and protection of the insulation from damage.
- Integral foam-filled horizontal struts at the top and bottom of door sections add rigidity for long life and smooth operation – extra strength without extra weight.
- Wind load models available. 
- Sound-absorbing insulation makes the door operate quieter and reduces wind rattle.
- Attractive, low-profile hinges provide maximum strength between sections and add stability compared with ordinary vertical hinges. Hinges are factory-installed for proper alignment and smoother door operation.
- Made with two layers of steel and polyurethane insulation.
- Bulb-shaped bottom seal remains flexible even in extreme cold to help keep the bad weather outside.
- SilentGlide™ nylon rollers with solid steel shafts provide years of smooth, quiet and dependable operation.
- Protective polymer caps add a finishing touch to the reinforcing struts.
- An insulated garage door improves thermal efficiency.

Safety and Security

Pinch-resistant design helps push fingers out of harm's way if accidentally placed near a closing door.

The Wayne Dalton TorqueMaster® Plus is the first counterbalance system to seal springs safely within a steel tube. It contains an anti-drop feature that reduces the risk of injury due to accidental release of tension.

Tamper-resistant safety bottom brackets help avoid possible injury by preventing inadvertent loosening when the counterbalance cables are still under tension.

Thermal Efficiency and Noise Control

- The R-11* polyurethane insulation is substantially more effective than the same thickness of common polystyrene.
- Bulb-shaped bottom seal remains flexible even in the cold to keep out bad weather.
- The foamed-in-place insulation helps block street noise from entering into living areas that adjoin the garage.

Warranty

Model 9600 offers a Limited Lifetime Warranty against cracking, splitting, rusting through or section deterioration. See dealer for complete details.

* Wayne Dalton uses a calculated door section R-value for our insulated doors.
